

Review QUIZ 1 of 2

Divide-and-Conquer (D&C)

(All questions are based on Lecture Notes. Go to the Lecture Notes and fully understand the topics!)

Q1. Describe a **recursive Binary Search** algorithm? Worst-case Recurrence Equation? Calculate Big-O?

[\[GO TO Lecture Note Slide #13, #15, #17, #19\]](#)

Q2. Describe a **Ternary Search** algorithm that **searches** a sorted array of n items by **dividing it into three sorted subarrays** of $n/3$ items. Worst-case Recurrence Equation? Calculate Big-O?

[\[GO TO Lecture Note Slide #20, #21\]](#)

Q3. Describe a **Merge Sort** algorithm? Worst-case Recurrence Equation?
Calculate Big-O?

[\[GO TO Lecture Note Slide #24, #25, #30, #29, #32, #36\]](#)

Q4. Describe a **Three-way Merge Sort** algorithm that **sorts** a list of n items **by dividing it into three sublists** of about $n/3$ items, sorting each sublist recursively and merging the three sorted sublists. Worst-case Recurrence Equation? Calculate Big-O?

[\[GO TO Lecture Note Slide #37, #38\]](#)

Review QUIZ 2 of 2

Divide-and-Conquer (D&C)

(All questions are based on Lecture Notes. Go to the Lecture Notes and fully understand the topics!)

Q5. Describe a **Quick Sort** algorithm? **Worst-case** Recurrence Equation?
Calculate Big-O?

[\[GO TO Lecture Note Slide #47, #48, #56, #57, #64\]](#)

Q6. **Best-case** Recurrence Equation of a **Quick Sort** algorithm? Calculate Big-O?

[\[GO TO Lecture Note Slide #58, #59, #60, #65\]](#)

Q7. Average-case Recurrence Equation of a **Quick Sort** algorithm? Calculate Big-O?

[\[GO TO Lecture Note Slide #61, #62, #65\]](#)

Q8. When Not to use D&C? **Why not?** An example problem when D&C is not efficient?

[\[GO TO Lecture Note Slide #91, #92\]](#)
